EQUIPMENT

SPECIFICATION

To provide the guard with a visible indication to quickly locate a faulty or jammed door.

FEATURES

- The display utilizes an two arrays of amber high intensity LEDs, which are flashing after the doors have been ordered to close and until they are fully closed. The LEDs will automatically dim at low ambient light conditions.
- The enclosure is made of stainless steel and fully sealed to prevent any water ingress.
- The unit is very easy to replace with four screws and an internal connector.

OUTCOME

In total, 3,000 units were supplied and, except for physical damage, have worked flawlessly.
